

Dashboard Insights

1. Monthly Sales Trend

The monthly sales trend indicates fluctuations in sales throughout the year. Certain months recorded higher sales, suggesting seasonal demand and variations in customer purchasing behaviour.

2. Regional Sales Performance

Among all regions, the West region achieved the highest sales, while the South region recorded the lowest sales. This highlights regional differences in market performance and sales opportunities.

3. Category-wise Sales Analysis

Technology emerged as the highest-performing product category, contributing the largest share of total sales. Furniture and Office Supplies generated comparatively lower sales.

4. Interactive Dashboard Analysis

The dashboard includes Region and Category slicers that allow users to filter data dynamically. This enables quick comparison of sales performance across different regions and product categories, making the dashboard more interactive and user-friendly.

5. Overall Business Performance

The dashboard provides a clear overview of total sales, sales trends over time, regional performance, and category-wise distribution. These insights help identify top-performing areas and support data-driven business decisions.
